## FRANCE SUPPORTING POLAND IN INVASION AND IN FIGHT AGAINST GERMAN CONTROL

New War Between Germans and Poles Practically Authorized by Lloyd George, With England Supporting Teutons-Only Backdown by French Will Prevent Hostilities.

Premier Lloyd George served an ultimatum on France to-day by announcing in the House of Commons that he saw no reason why Germany should be prevented from preserving order in Silesia against Polish aggression. A new war be een Germany and Poland is thus practically authorized by the British Premier, with Great Britain supporting Germany. Only a backdown by France can prevent hostilities.

Lloyd George's sensational declaration has been caused primarily by France's support of Poland's effort to annex Upper Silesia by force of arms. The French Government could halt the Polish movement by a simple word, because all the influence the Allies now posses at Warsaw is in France's keeping. But France has refused to interfere with the imperialistic aims of her protege because France wants to do everything possible permanently to weaken Germany.

France has declared that if German troops are used to repel the Poles, France will invade the Ruhr. Germany, however, now has British sanction for doing this very thing, and Italy supports England. Unless, therefore, France backs down, the Allies are heading for a serious sp"

with Great Britain and Italy supporting Germany against France. Lloyd George undoubtedly has adopted a grave tone for the express purpose of making the issue clear to France from the start.
